

We are excited to announce that Swickard Chiropractic Clinic of Shawnee, PA will be offering the Ideal Protein Weight Loss Program!

The Ideal Protein Weight Loss Method is a medically designed protocol that results in fat loss while sparing muscle mass. The protocol was developed in France 25 years ago by Dr. Tran Tien Chanh, MD PhD, who focused his career and research on nutrition with a particular emphasis on the treatment of obesity and obesity related issues.

The Ideal Protein Weight Loss Method is an easy 4-phase protocol which helps stabilize the pancreas and blood sugar levels while burning fat and maintaining muscle and other lean tissue. This protocol is also an excellent support for cellulite reduction and has been used in well over 2500 Professional Establishments in North America over the last eight years with great success.

Here is a short video that provides an overview of the Ideal Protein Weight Loss Program. Please take the time to watch this informative presentation.
