CURIS FUNCTIONAL HEALTH Informed Consent

Please read this entire document prior to signing. Ask questions before you sign if there is anything that is unclear.

Based on my complaints and the history I have provided, I hereby authorize Curis Functional Health ("the Practice") and its licensed doctors and assistants to undertake an examination and provide an evaluation and treatment plan that may include chiropractic adjustments and other tests and procedures considered therapeutically appropriate. I understand that state law entitles me to receive information concerning my condition and proposed treatment and refuse any treatment to the extent permitted by law. With that knowledge and with my consent, I wish to rely on the Curis Functional Health doctors to make those decisions about my care, based on the facts that they believe are in my best interest.

As a part of the analysis, examination, and treatment, I am consenting to services that may include: Chiropractic adjustment, palpation, massage therapy, spinal decompression, intersegmental traction, vital signs, range of motion testing, orthopedic testing, neurological testing, muscle strength testing, postural analysis testing, hot/cold therapy, EMS, radiographic studies and other procedures as necessary. The nature and purpose of the chiropractic examination and evaluation, the chiropractic adjustments, and the other procedures that may be recommended during the course of my care have been explained and described to my satisfaction.

Based on current findings, I understand that the Practice doctors will discuss my diagnosis and treatment plan, the benefits and expected improvement with the proposed treatment, and the reasonable alternatives to the proposed treatment. They will also explain the cost of my proposed care (or provided me with a current fee schedule).

I have also been advised that although the incidence of complications associated with chiropractic services is very low, anyone undergoing adjusting or manipulative procedures should know of rare possible hazards and complications which may be encountered or result during the course of care. These include, but are not limited to, fractures, disk injuries, strokes, dislocations, sprains, and those that relate to physical aberrations unknown or reasonably undetectable by the doctor. Some types of manipulations of the neck have been associated with injuries to the arteries in the neck leading to or contributing to serious complications including stroke. Some patients will feel some stiffness and soreness following the first few days of treatment. The Doctor will make every reasonable effort during the examination to screen for contraindications to care; however, if I have a condition that would otherwise not come to the Doctor's attention, I understand that it is my responsibility to inform the Doctor before treatment.

The availability and nature of other treatment options may include self-administered, over-the-counter analgesics and rest, medical care and drugs such as anti-inflammatory, muscle relaxants, and pain-killers, hospitalization or surgery. If one chooses to use one of the above noted "other treatment" options, one should be aware that there are risks and benefits of such options, and I understand that I may wish to discuss these with my primary medical physician.

New Patient Health Intake Form

The risks and dangers to remaining untreated:

Remaining untreated may allow the formation of adhesions and reduce mobility, setting up a pain reaction and further reducing mobility. Over time this process may complicate treatment making it more difficult and less effective the longer it is postponed.

This document is intended as a general, broad-based consent applies to any and all contemplated procedures. I have discussed all of the above risks and benefits with the Practice, and, if applicable, have made an informed decision that the potential benefits outweigh the risks in my case.

I understand and accept that:

1. I have the right to withdraw from or discontinue any treatment at any time and that the Practice doctors will advise me of any material risks in this regard.
2. That neither the practice of chiropractic nor medicine is an exact science and that my care may involve making judgments based upon the facts known to the doctor during my care.
3. That it is not reasonable to expect the doctor to be able to anticipate or explain all risks and complications or an undesirable result does not necessarily indicate an error in judgment or treatment.
4. The Practice does not guarantee as to results with respect any course of care or treatment.
5. My care and treatment will not be observed or recorded for any non-therapeutic purpose without my consent.

I have read this Consent {or have had it read to me) and have also had an opportunity to ask questions about the Consent and understand to my satisfaction the care and treatment I may receive. My signature below acknowledges my consent to the Practice's examination, evaluation, and proposed course of care and treatments.

Office Financial Policy

1. As a service to you we verify how your insurance company supports your care in our office. If we are unable to verify prior to the end of your first visit our policy is to collect \$75. Once benefits are known any credit will be refunded to you or used for future visits if you wish. Any balance will be due at your next visit.
2. We will collect your deductible, co-pay, uncovered services, and/or the percent you are responsible for at the time of each visit.
3. We will submit claims to your insurance and collect according to how they support your care. In the event insurance denies care (examples: services are not a covered benefit, insurance determines care is not medically necessary, etc.) you become responsible for the balance. You will be become a "self-pay" patient and will be responsible for the fees. Our self-pay fee for spinal manipulations is \$45. Other treatments and services have additional fees.
4. SELF-PAY Patients: This includes patients with no insurance, patients who have insurance plan with which we do not participate or patients that have exhausted their benefits.
5. All effort is made by our billing office to work closely with the insurance companies. 99% of the time we are quoted the correct benefits, however, benefits are sometimes misquoted. If we are misquoted and a balance is due on your account, it becomes patient responsibility. It is highly recommended that you verify your benefits as well.
6. Personal injury, Workman's Compensation and Auto cases. A signed lien will be required allowing payments to be made directly to us. We file on your behalf. Should benefits be exhausted or denied any unpaid balance becomes patient responsibility.
7. Delinquent accounts over 90 days old will be sent to a collection agency. Any fees incurred will become patient responsibility.
